ABSTRACT

This annual report from North Dakota describes enrollment, programs, funding, and special projects statewide in special education for the 1993-94 school year. During the year, 12,435 students with disabilities, ages 0-21, received special education services in the state. Of these, 12,180 were served in public schools and 255 students were served in state-operated programs. These numbers indicated a slight reduction over the previous year. Programs for gifted and talented students served 1,597 students (substantially more than during the previous year). Funding was provided to special education units through Chapter 1 of the Education Consolidation and Improvement Act, Part B of the Individuals with Disabilities Education Act (IDEA), and state special education funds. A summary statement provides information for the state as a whole on numbers of students served (by disability and age), numbers of teachers, funds expended and their sources, numbers of schools, and screening activities. The same information is then provided for each of 31 local special education units and for nine state-operated programs in public and private schools. Brief status reports are provided on the IDEA-B Advisory Committee, technical assistance and inservice activities of the Mountain Plains Regional Resource Center, special grants, and North Dakota programs for gifted and talented students. FOREWORD

The Special Education staff is pleased to present this annual report to the Superintendent of Public Instruction and the citizens of North Dakota.

The major portion of this report describes the numbers, programs, funding, and special projects for the 1993-94 school year. Funding was provided to special education units through Chapter 1 of the Education Consolidation and Improvement Act (P.L. 100-297); Part B of the Individuals with Disabilities Education Act (P.L. 94-142); and state special education funds. A state summary, individual unit, private school and state operated programs are detailed in this report.

In the 1993-94 school year, 12,435 students with disabilities ages 0-21 received special education in North Dakota. Of the total number of students with disabilities, 12,180 were served in public schools and 255 students were served in state operated programs (state schools and infant development programs). This compares to 12,830 students with disabilities ages 0-21 served during the 1992-93 school year. Of the 1992-93 total students with disabilities, 12,528 were served in public schools and 302 students were served in state operated programs.

Programs for the gifted and talented provide special education to students whose abilities require instructional content or strategies which cannot be provided in the regular classroom. These programs are also administered and partially funded through the state special education program. There were 1,597 students served in this program this past year compared to 1,107 students served during the 1992-93 school year.

This report represents continuing progress toward the major special education goals of the department. They include:

1. Provision of quality service to students with disabilities.
2. The equalization of educational opportunity for students with disabilities.
3. The provision of services in the most cost effective manner.
4. Facilitating cooperation between school districts for the provision of service to students with disabilities.

Continuing to work towards the achievement of the above goals remains a priority of the Department of Public Instruction.

Through the Special Education Annual Report, the Division of Special Education extends its thanks to all professionals, legislators, and parents who have made it possible to maintain our common commitment to serve children with disabilities in North Dakota.

Gary W. Gronberg, Ed.D.
Director of Special Education
Department of Public Instruction

IDEA-B ADVISORY COMMITTEE FOR NORTH DAKOTA

The IDEA Advisory Committee for North Dakota met July 11 & 12, 1994. Chair Stephen Ragan presided over the meeting. Gary Holm noted that the committee is empowered to be as active as it wishes and that it has broad jurisdiction over special education programs in North Dakota. He said the committee could meet as often as it wishes. It was noted that the purpose of the committee is stated in Article II of the By-Laws. It was agreed that the committee should meet in December and have a conference call in February to review the 1996-98 Special Education Plan for North Dakota. The committee decided to review the 1992-95 Plan in preparation for the 1996-98 plan review. Gary Gronberg reviewed the 1994 legislative session. Draft Special Education related bills for the 1995 Session were reviewed. It was noted that the Education Services Committee meets August 22 & 23 to review the Bills. There was consensus that the IDEA Committee should provide input on the bills. The chair appointed a subcommittee to review 1995 Session draft Special Education bills and resolutions. Presentations were given on State Monitoring, Federal Monitoring, Due Process/Complaints, the Transition Grant, Deaf-Blind Grant, Regional TA Project, Needs of Disabled Student Grant, Leadership Strategies, Building Level Support Team Project, School Psychology Program, CSPD Task Force Committees, CSPD Strategic Planning, CSPD Data System Program, CSPD Health Care Task Force, Autism Grant, Assessment Training, Parent Rights Video, Para Educator Training, Speech Guidelines, Special Projects, Early Childhood Tracking System, Statewide Data Systems Project

Members of the North Dakota IDEA Advisory Committee are:

Mr. Jaime Galloway, Devils Lake
Ms. Micky Post, Tioga
Mrs. Liz Baldner, Fargo
Ms. Linda Bickler, Minot
Ms. Teresa Kurtz, Cleveland
Mrs. Faye Gibbons, Grand Forks
Ms. Carol Nilles, Casselton

Mr. Garry Freier, Bismarck
Mr. Terry Tucker, Dickinson
Mr. James Leary, Bismarck
Mr. Robert Graham, Bismarck
Dr. Stephen Ragan, Minot
Ms. Gladys Mack, Minot
Mr. Duane Bauer, Bismarck

TECHNICAL ASSISTANCE AND INSERVICE ACTIVITIES SUPPORTED IN PART BY MOUNTAIN PLAINS REGIONAL RESOURCE CENTER LOGAN, UTAH

1. Building Level Support Team Effort

Five inservice training workshops were conducted for Building Level Support Teams during the 1993-1994 school year. The trainers were Dr. Margaret Pysh and Dr. James Chalfant from the University of Arizona. They are the authors of the BLST process and provide innovative ideas for the teams to initiate at the local school buildings to assist teachers in determining and implementing intervention strategies for students who are experiencing difficulties in the classroom. The Department of Public Instruction sponsored three training sessions for teams of personnel from school districts interested in beginning level training. Two additional training sessions were provided for the schools that had active Building Level Support Teams so they could obtain additional information regarding the process.

A total of 292 educators, representing 97 school districts throughout North Dakota, participated in the five training workshops. They were conducted in four different locations so not any of the teams had to travel long distances.

SPECIAL GRANTS

1. Services for Children and Youth with Dual Sensory Impairments

The grant for Children and Youth with Dual Sensory Impairments was funded by the U.S. Department of Education for the 1993-94 school year at \$69,000. The major portion of the grant supported travel and training for the Statewide Technical Assistance Team (STAT). The STAT team conducted assessments and provided assistance in program planning for children and youth with identified or suspected dual sensory impairments. The composition of the STAT team varied based on the geographic location of the referred student and the type of assessment requested.

Activities completed by the STAT Coordinator include: conducting follow-along sessions on assessments completed last year; facilitating a statewide vision screening for students who are hearing impaired; conducting the annual Deaf-Blind census, which identified 50 students birth-21; providing resource information to teachers and families; publishing *The Informer*, a newsletter for the project; adding materials to the project library; providing statewide and regional trainings for STAT members, other educators and families; and providing telephone consultations to parents and educators.

2. Preschool (Section 619) and Part H Grants of IDEA

The Department of Public Instruction received Preschool Grant (ages 3-5) funds from the United States Department of Education beginning July, 1993. The amount received was \$801,115. Eighty percent of this was distributed to local programs on a per child basis. The remaining twenty percent was used for state discretionary projects and for administration of the grant. In addition, the Department of Public Instruction received \$267,257 as a subcontract from the Department of Human Services to carry out Part H Grant activities. Part H is a section of IDEA that addresses programming for infants and toddlers (ages birth-2) with disabilities.

North Dakota, with its intent to provide a seamless system of services for children from birth through age five, has used combined funding sources to collaborate various activities under each grant. Therefore, the following descriptions will not separate activities by funding source.

A. North Dakota Early Childhood Tracking System (NDECTS)

The NDECTS has been operational statewide since 1991 in all eight Governor's Planning Regions and on all four reservations (Fort Berthold, Standing Rock, Fort Totten, and Turtle Mountain). NDECTS is an interagency effort to identify, monitor and make appropriate referrals of children, ages birth to six, determined to be at risk for developmental delays. Local interagency teams meet on a regular basis to review referrals, schedule monitoring efforts, and coordinate services to the children and their families. Monitoring data is gathered either through parent questionnaires or local interagency screenings.

NDECTS is designed to address the following objectives:

- (1) provides a single point-of-entry for all children considered to be at risk, thereby simplifying the referral process for all agencies and providers and addressing the various, unique needs of all children;
- (2) provides a systematic, coordinated, multi-disciplinary manner of monitoring at-risk children, thereby optimizing a child's access to services at the earliest opportunity;
- (3) provides parents of at-risk children a clearinghouse for information on existing services to meet a child's or family's needs, thereby simplifying parents' access to a variety of agencies and providerships;
- (4) provides a system whereby children with developmental delays are identified and matched with appropriate services to prevent, minimize, or reverse future difficulties for the child and family;
- (5) provides a system for the coordination of services offered by participating agencies and providers for families of at-risk children, thereby improving the efficiency of service provision;
- (6) provides parents with important educational materials concerning the growth and development of children, thereby further empowering parents to foster this growth;
- (7) provides a data management system which collects and compiles information on the state's population of at-risk children and the services they receive, thereby offering policy makers vital information required for the conduct of public policy;
- (8) with its emphasis on interagency cooperation, offers a plausible format for the structuring of early intervention services and offers a model for the design and conduct of public policy in other areas of attention.

Four project coordinators direct NDECTS activities among the state's four quadrants. One project coordinator directs NDECTS activities on each of the state's four reservations. The NDECTS project coordinators facilitate the formation, inservicing, monitoring activities, and service referrals for the 37 local NDECTS teams that operate statewide. Local NDECTS teams involve the participation of local special education units, Head Start, Developmental Disabilities, Infant Development, county social services, public health, tribal health, BIA, regional medical facilities, EPSDT, WIC, extension service, and other appropriate local service providers. The NDECTS participates with local special education units in implementing local interagency selective screening efforts. Selective screening materials have been developed to assist in coordinating interagency screening programs, including referrals, screenings, and follow-up of screening activities. NDECTS has revised its administrative manual to accommodate its structural growth and interagency foundation.

NDECTS manages a statewide data management system designed to facilitate the coordination of the program's caseload, enhance interagency data collection standards, and conduct the longitudinal study of at-risk children within the state. Effective July, 1994, approximately 4000 children were being actively monitored in NDECTS statewide.

NDECTS participates in several special interagency projects. Some of these projects include the following:

- (1) **Child Find.** NDECTS offers an essential structure for Child Find activities statewide. NDECTS cooperates with the Part H Interagency Coordinating Committee to plan, conduct and coordinate various Child Find efforts, including a standard Child Find logo, media campaign, service protocol, etc.
- (2) **Interagency Agreements.** As mandated by IDEA Part H law, North Dakota is required to establish a state-level interagency agreement among all agencies that provide services to young children. NDECTS has contributed as a partner in the North Dakota Part H agreement. NDECTS is also acting as facilitator for the 37 local interagency teams as they develop local interagency agreements that mirror the state-level agreement. The local agreements are expected to be developed throughout 1994-95.
- (3) **Reservation Tracking Assistance Project.** The Tracking Assistance Project is a reservation-based program which closely monitors the development of children with home visitations. With the enactment of P.L. 102-119, responsibility for this project shifted to the four tribal councils. The Tracking Assistance Project is now funded through Part H and Section 619 funds allocated directly to the tribal councils. State and tribal agreements are being prepared for each reservation to clarify the working relationship between the Tracking Assistance Project and the NDECTS.
- (4) **State Birth Review Project.** The State Birth Review Project is a joint project among the Departments of Health, Human Services, and Public Instruction. NDECTS is an active participant in this child find project. The Birth Review Project confidentially and automatically reviews all birth certificates for at-risk factors which might anticipate possible developmental delays. Parents are alerted and invited to participate in various appropriate services, including NDECTS. Since its start-up in April, 1993, monthly computer scans have indicated that approximately 30% of children in North Dakota have risk factors recorded on their birth certificates. Of these children, approximately 15% of the parents are enrolling their children into NDECTS through this program.
- (5) **Parenting Initiatives.** NDECTS is working closely with the Children's Services Coordinating Committee concerning education outreach projects for fostering parenting skills.
- (6) **Statewide Data Systems Project.** Throughout 1993-94, NDECTS was one of five national sites to be awarded a grant for the advancement of interagency data management systems for at-risk children. This three year grant will generate three items: (1) an interagency agreement and manual on the standardization of data files, fields, and applications for computer programs; (2) the incorporation of these standards into the NDECTS Data Management System and its further embellishment of applications; and (3) the creation of an Interagency Modular Data Management System based on the interagency data standards.

NDECTS is funded from IDEA-Part H and IDEA-Section 619 funds. NDECTS is a coordinated effort of the Departments of Health, Human Services, and Public Instruction and has been developed in response to PL 99-457. The Department of Human Services is lead agency for 0-2 year old services. The Department of Public Instruction is lead agency for 3-5 year old services. By agreement NDECTS is housed within the Special Education Division of DPI.

B. Inservice Training for Early Childhood Personnel

In September of 1993, the Department of Public Instruction co-sponsored the Fall Conference for the North Dakota Association for the Education of Young Children by providing presenters for the conference sessions. The conference was attended by approximately 250 personnel from various agencies and child care programs from across the state.

In February of 1994, the Department of Public Instruction co-sponsored with the North Dakota Council for Exceptional Children and the North Dakota Division of Early Childhood, a pre-conference session at the state CEC conference. The topic for the session focused on cultural diversity. The session was attended by approximately 70 personnel from various agencies across the state who work with young children. The conference was held in Grand Forks, ND.

In June of 1993, the Department of Public Instruction co-sponsored with the Head Start Region Eight Resource Access Project a one and one half day workshop on "Developing Interagency Agreements Between Head Start and LEA's". The workshop was held in Bismarck, ND and was attended by approximately 45 Head Start and special education personnel from across the state.

C. North Dakota Interagency Coordinating Council (NDICC)

The North Dakota Interagency Coordinating Council (NDICC) met four times during the past year. The Council met to review recommendations of the subcommittees and make policy

recommendations to the lead agencies. The Council also addressed additional policy and procedural issues regarding the implementation of Part H in North Dakota. Through the efforts of the Council a full time NDICC Coordinator was hired. During the year several NDICC members attended the national Part H conference and other NEC*TAS sponsored topical meetings focusing on Part H reauthorization, data management, health care reform, working with Native American Reservation Tribal Councils and general Part H topics. Those attending reported to the Council.

The following NDICC subcommittee work was completed this year. The Child Identification subcommittee continued efforts on a Child Find public awareness campaign, entering year three of a five year campaign developed by a commercial graphic art company to target the audiences identified from surveys completed previously by the subcommittee. Several hundred Child Find packets and thousands of Child Find Picture magnets have been distributed.

The Interagency Collaboration subcommittee continued its efforts with individual state agencies and Head Start to formalize a state level interagency agreement. This agreement is currently being signed by the eight participating programs and agencies. The process for writing local/regional agreements for early intervention services has been developed and local agreements will be written this year.

The Personnel Development subcommittee continued work with the state IDEA Task Force on CSPD to coordinate pre-service and inservice training for early intervention personnel (birth through five). This committee has laid the foundation for a statewide registration system for early intervention personnel and early intervention interdisciplinary training clearinghouse.

The Family Involvement subcommittee continued their work with the Cooperative Services Task Force charged with the development of an IFSP/IEP to be used for children from birth through age two and during the transition process into early childhood special education programming. This subcommittee is actively working to develop a parent to parent link program for North Dakota parents with children with disabilities birth through five.

The Program Standards subcommittee completed revision of the Early Childhood Special Education guidelines for children ages three through five. This subcommittee provided further recommendations for the Infant Development guidelines for services to children with disabilities birth through two.

The Evaluation and Assessment Task Force completed the guidelines describing the process for identification, location and evaluation of children in North Dakota from birth through age five. This document has been referred to both Human Services Development Disabilities and DPI for adoption and dissemination.

D. Preschool Discretionary Grants

The Department of Public Instruction used preschool discretionary grant money to partially fund the inservice trainings discussed earlier and to support the joint efforts of the NDICC and its subcommittees. The Department also partially funded the attendance of parents, NDECTS coordinators and LEA personnel to a variety of training sponsored by the National Early Childhood Training and Technical Assistance Center (NEC*TAS).

Discretionary funds were allocated to the Northern Plains Special Education Unit in the amount of \$7,000 for planning and implementing a parent involvement project for the public schools. This was a one year project.

E. Interagency Collaboration

The Department of Public Instruction, the Department of Human Services, the Department of Health and the North Dakota Head Start programs renewed a state level interagency agreement that addressed roles and responsibilities of various programs within their departments and outlined areas of cooperation among the agencies. The Department of Public Instruction initiated, with the twelve local Head Start programs and special education units serving those programs, efforts to establish local interagency agreements outlining areas of responsibilities and collaboration.

The North Dakota Early Childhood Training Center, in conjunction with the Department of Public Instruction, was awarded in July, 1991, a grant from the North Dakota State Council on Developmental Disabilities. This one year project was extended in July, 1992, to continue the provision of training to child care providers across the state. The grant was completed by May, 1994. An evaluation of the two year project was completed and results reported to the North Dakota State Council on Developmental Disabilities.

F. Technical Assistance to Local Programs

Department personnel responded to local technical requests for information, resources, consultation, site visits, etc. on an ongoing basis.

3. Training Personnel for the Education of Students with Disabilities Part D, IDEA

The Department of Public Instruction was awarded a grant from the United States Office of Education, Division of Personnel Preparation, to provide funds to assist individuals interested in retraining through graduate level coursework in areas of special education. Awards were made available in all areas of special education and related services. The Comprehensive System of Personnel Development (CSPD) committee and special education unit directors identified personnel shortages in areas of special education. Preferences were given to individuals recruited from the local special education units who stated their intention to return to their local communities to meet the needs identified as priority areas for their units.

Twenty-one summer traineeships in the amount of \$1000 each and fourteen full year internships in the amount of \$5000 each were awarded during the 1993-1994 school year. These awards were made in the disability areas of: specific learning disabilities, seriously emotionally disturbed, preschool handicapped, speech/language pathology and school psychology.

4. Training Activities Funded under Part B of IDEA

A. Speech Outreach Courses

The Department of Public Instruction collaborated with the University of North Dakota and Minot State University to offer courses in the area of Communication Disorders to assist Bachelor level Speech/Language Pathologists (SLPs) in obtaining Master's Degrees. The purpose was to provide outreach courses that were located throughout the state on weekends so they were readily available to all students. During the 1993-1994 school year, twenty-one Speech/Language Pathologists participated in the courses. Twenty SLPs have received their Master's Degrees through a combination of speech outreach courses and summer school sessions at one of the universities.

Funds for these courses are provided through IDEA-B discretionary sources. Cost of the courses was approximately \$6,000 during the past school year.

B. Comprehensive System of Personnel Development

The Comprehensive System of Personnel Development (CSPD) Committee was established in the fall of 1991 for the purpose of making recommendations and advising the Department of Public Instruction concerning the training of personnel, the gathering of needs data and the evaluation of special education programs in the state. The committee is comprised of representatives from: parents of students with disabilities, state and local education officials, local special education administrative personnel, teachers of students with disabilities, agency representatives from state Vocational Rehabilitation and Developmental Disabilities, and North Dakota university training programs.

The CSPD committee, through monthly meetings, developed and periodically reviews a strategic plan for meeting the professional development needs of ND educators, related service providers, agencies and families involved with the education of students with disabilities. The plan is driven by a vision of education for all children. Specific issues that will lead to the realization of the vision are targeted and solutions and strategies to address these issues are being developed.

The committee commissioned the formation of various committees to study specific program development areas. The following is a description of the committees operating during the 1993-94 school year.

- (1) **Students with Special Health Care Needs:** This 16 member committee reviewed the current status of school health services, reviewed staffing and service needs, made recommendations concerning policies/guidelines, and reviewed resources and needs for pre/in-service training. Written guidelines were drafted.
- (2) **Personnel Data Management:** This four member committee was initiated to develop a system to meet IDEA requirements regarding North Dakota's Comprehensive System of Personnel Development. The committee is reviewing data already collected, as well as identifying additional data needed to report status of personnel. Relatedly, plans for a study to identify reasons special education personnel remain employed in the state or leave, were developed.
- (3) **Service Delivery in a Rural State:** This nine member committee concluded its review of the current status of service delivery in North Dakota, including the staffing and service needs, resources, and needs for delivery of pre/in-service training. Recommendations were made regarding certification requirements for personnel relative to role changes in all disability areas.
- (4) **Speech/Language Pathology:** This nine member committee reviewed the current issues and status of services, made recommendations regarding recruitment and retention of qualified staff, made recommendations regarding resources and needs regarding pre/in-service training, and studied the impact and feasibility of use of speech technicians.

The document, *Guidelines: Speech and Language Services in the Public Schools*, was printed in November 1993 and disseminated to schools in January 1994.

Each committee was represented by educators, parents, the Department of Public Instruction, related service personnel when appropriate, and others as needed. The committees presented their findings to the CSPD Committee for inclusion into the CSPD strategic plan.

The cost of travel for task force and CSPD members were paid through IDEA-B funds.

C. Paraeducator Project

The North Dakota Department of Public Instruction and the North Dakota Center for Disabilities collaborated in a project to develop a training program for paraeducators (aides) who assist student with disabilities in educational settings. The North Dakota Paraeducator Training Project is in its second year. The project is in the process of developing a comprehensive curriculum and providing training to the state's special education paraeducators. The training is provided via a field based model, with adjunct instructors in each special education unit receiving curriculum materials and training in the usage of these materials. Year-one was devoted to setting up the project in four pilot sites, with year-two adding an additional fourteen special education units. Three hundred and eight paraeducators have undergone some training in the project. IDEA Part B discretionary funds were disseminated to fourteen special education units to assist them in providing the training at the local level.

D. Leadership Strategies

Leadership Strategies workshops were sponsored through the collaborative efforts of the ND Department of Public Instruction and the ND LEAD Center. Each workshop was conducted in a one and one-half day seminar format. A team of facilitators lead each Leadership Strategies training session. The team represented practitioners from North Dakota, including elementary and secondary school administrators, university education administration faculty, and special education directors. The program is designed for principals, assistant principals, directors, superintendents, school board members, and other administrators. Participants engaged in small and large group interactions and simulations to foster active learning and group problem solving. The program objectives are to help participants:

- recognize their leadership role in a team approach to making decisions about providing educational services to all students;
- develop greater resourcefulness in their capacity to lead and manage programs for all students;
- develop building level education systems in which special educators provide a variety of support services to regular educators who teach both typical and identified students with disabilities; and
- recognize that all children have unique learning needs and most of these needs can be met in least restrictive environments when provided appropriate support.

Seven workshops were held during the 1993-1994 school year. They were hosted by eight different special education units and 142 administrators participated in the workshops. Materials and training were provided through the use of IDEA-B discretionary funds.

5. North Dakota Secondary Transition Project/Transition Systems Change Grant

In October, 1992, the North Dakota Department of Public Instruction was awarded a five year, \$2.5 million grant by the United States Department of Education to develop and implement a comprehensive statewide system of transition planning and service delivery for youth with disabilities age 14 and older. Project TransND was proposed jointly by the office of Vocational Rehabilitation and the Department of Public Instruction. The amount of the grant for the 1993-94 fiscal year was \$515,987.

The goals of the project are to: (1) design, implement and improve an integrated transition planning and service delivery system that meets the needs of youth with disabilities and that considers the unique characteristics of North Dakota; (2) identify and provide resources essential to support an integrated transition planning and service delivery system; and (3) develop and deliver training to support the participants to optimize use of the transition planning and service delivery system.

The North Dakota Transition Steering committee is comprised of five permanent members representing the Department of Public Instruction, Division of Developmental Disabilities, Office of Vocational Rehabilitation, Vocational and Technical Education and Job Service of North Dakota, who meet every other month to oversee the transition activities in North Dakota.

Guiding the overall direction of the project is the State Transition Planning Council (STPC) consisting of 20 members representing various agencies, organizations, business and parents concerned with transition.

Dr. Eugene Edgar, University of Washington, has been retained as the independent evaluator for TransND. He, the Steering Committee, STPC and Project Director/Coordinator have developed and refined the evaluation plan to include the follow-up/follow along systems of the data management focus group.

Also in place for the Project are a Project Director/Coordinator, a Management Information Specialist and a Secretary/Librarian, housed at Minot State University. Regional Transition Boards were organized, one in each of the Governor's Planning Regions, and one for the four Indian Reservations in North Dakota. Through a request for proposal process, the Regional Governing Boards access funding to develop transition activities to meet the needs of the region under the direction of a Regional Transition Coordinator (RTC). The Regional Coordinator works with schools and teachers, agency personnel, parents and students to ensure transition planning is available, appropriate and initiated for life beyond high school in the areas of jobs and training, recreation and leisure, community participation, independent living and post secondary training.

The Project developed a Media Center/Library, whose materials are used by students, teaching staff, parents and agencies, as well as displays at local and regional training sites, conferences, etc.

The services of the Transition Project also include development and endorsement of community-based curriculum guidelines for special education students, extensive training to educators, parents, students and agencies as to their role in transition, evaluation of the IEP process, tracking of special education dropouts, development of student transition planning folders and a newsletter.

It is the intention of the Project to ensure services on a regional basis, but also with the fullest cooperation from the state level to develop and endorse transition planning and initiation for special education students for life beyond high school.

NORTH DAKOTA PROGRAMS FOR GIFTED AND TALENTED STUDENTS

During the 1993-94 school year, 15 school districts in 10 special education units served students identified as gifted and talented in the state of North Dakota. Reimbursement for approved programs was provided with state monies through the Division of Special Education.

The means of reporting services shifted to a new format that identified numbers served in each of four levels of service, and expanded the types of activities considered as enrichment. The new reporting is consistent with the state adopted Levels of Service approach, which provides new definitions of giftedness and guidelines for identification and service options. School districts electing to provide services were required to submit plans to describe movement toward the Levels of Service approach. The State Steering Committee on Gifted Services, which had provided guidance for a previous Jacob Javits Grant, was reactivated September 1, 1994.

Provide a State Information and Resource Center on Gifted and Talented

Teachers sought consultations with the TAG Resource Center to gain an idea of resources they could use with their students and a direction to start in their efforts to work with gifted children. These consultations were done both in person and via the telephone.

Requests were mailed, phoned, faxed, or sent by electronic mail, as well as through visits and presentations. The approximate number of materials checked out during this period was 2,500. The resources were used by approximately 450 teachers, parents or administrators.

One of the kits provided by the TAG Resource Center, Lego TC Logo, used to teach mechanics, physics and problem solving, was so popular that a cooperative effort was continued with the Continuing Education office at North Dakota State University to provide a graduate credit workshop on using the materials in the regular classroom. An emphasis was given to using the materials to develop giftedness. Six schools from across the state sent teams of 3-4 teachers. Each team worked together with one starter kit. Instruction was done over the Interactive Video Network to accommodate teachers from outside the Fargo area. A follow-up course was offered in Fargo to provide technical assistance in integrating the use of Lego TC Logo into their curriculum. This workshop incorporated a group of 12 students in the afternoon in a clinic to test the interdisciplinary curriculum developed by the teachers in the morning.

By working with SEND IT, mini-grants were offered to four projects to develop curriculum for the On-Line Discovery Project. Projects were developed that utilized the resources of SEND IT to develop giftedness on weather, global warming, literary devices and the future.

The TAG Resource Center was also involved in facilitating the second year of the state Odyssey of the Mind competition. This is a creative problem solving program for students in grades K-12. Two regions were established for the first time. There were 182 teams of 5-7 students involved in the regional tournaments. Seventy-six teams moved on to the state tournament. This doubled the participation from the first year of the program.

Governor's School

The Governor's School was held for six weeks during the summer of 1994 on the North Dakota State University campus in Fargo. Forty students attended the residential program, with 20 students enrolled in the math component and 20 students enrolled in the science component. Governor's school, which was initially funded under a Jacob Javits Grant, continues with state support.

A videotape, *What Did You Do At Governor's School?*, was produced for use in recruiting students and informing school personnel, community members and legislators.

Mentorship Network

Due to the lack of funding, the mentorship pilot sites were forced to continue their programs during the 1993-94 school year with no grants from the state.
